Grout

SOLUTION

Dirt
Moisture
Stains

SUMMARY

The heavily trafficked red tile and white grout lobby area of the Liaison Hotel in Washington, D.C. was in need of constant cleaning and needed protection. In February 2008, TruNano™ Multi-Surface Sealer was applied with a clean pump sprayer and rolled in with two coats to shield the tile from stains and water damage. It was ready to walk on in four hours, and fully cured within seven days. Spots on the tile can easily be washed away with environmentally friendly cleaners, as opposed to high pressure power washing and harsh chemicals. To see TruNano™ Multi-Surface Sealer in action, watch our product demonstration video at www.tru-nano.com.
