Marble Bar
Hyatt Hotel
Las Colinas, Texas

SURFACE

Marble Bar Top and Counter

SOLUTION

Food Acid Etching
Staining
Moisture
Abrasion

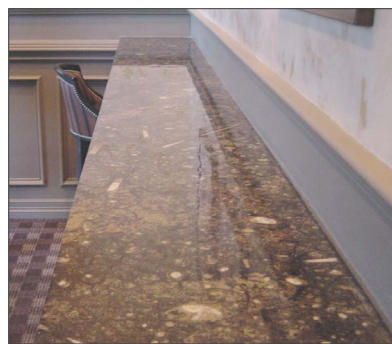

SUMMARY

The Four Seasons Hotel in Irving, Texas, remodeled the lobby bar and installed new marble bar tops. The very expensive marble quickly became extremely etched and discolored from lemon and lime juice spills. Although only a few weeks old, the stone already looked stained and damaged. After removing the existing sealer that had failed to protect the stone from etching, TruNano™ Stone Armor was applied to the marble bar in July, 2008. To see how TruNano Stone Armor repels moisture and resists stains, watch our video at www.tru-nano.com.

BEFORE

Food acids and moisture have heavily stained a marble bar top.

AFTER

Marble was refinished and coated with TruNano™ Stone Armor.
