Wood Counters
Wood Tables

SOLUTION

Food Acids
Scratches
Moisture Damage

SUMMARY

Mizu Sushi in Austin, Texas filled their new restaurant with beautiful Mesquite tables and build the sushi bar from the same rich wood. After a polyurethane sealer failed from exposure to moisture, soy sauce and other food acids, the tables and bar were coated with TruNano™ Wood Armor. Two years later, a waiter was heard exclaiming, “Even sticky rice won’t stick to it!”. To learn more about TruNano™ Wood Armor, watch the video at www.tru-nano.com.
